the guest.

guest muse

- Marketing Target: Millennial Men and Women, 18-35
- Have a desire to live a more considered life, with less focus on things
- They have basic items that serve as the base layer of their home's style and function
- They don't want to spend more than they have to on these essentials but it's important that they work well, are thoughtfully designed and surprisingly long lasting

their style

- Their style at home may be a mix of different looks, but for everyday items they want a simple, straight-forward style that can blend seamlessly into any decor
- Function and efficiency of form and material define this aesthetic — not the other way around
- Not stark or sterile, but a style that is clean and uncomplicated but still approachable, warm and happy

needs & wants

- They want to support brands that value a better world like they do
- Buying cheap, items that don't function well or need to be replaced again and again goes against their core values of being economic and eco-conscious
- They appreciate the story behind the item and love a sense of joy brought into the littlest details
